Please consult your reseller or Panasonic representative to learn more about the TOUGHBOOK 34 and the wide variety of accessories and services offered.

1 Base model tested by national independent third party lab following MIL-STD-810H Method 516.8 Procedure IV for transit drop test and IEC 60529 Sections 13.4, 13.6.2, 14.2.5 and 14.3 for IP.

2 Insertable Smart Card, Contactless Smart Card, and Fingerprint Readers in Rear Expansion Area are mutually exclusive.

3 1GB = 1,000,000,000 bytes. Total usable memory will be less depending upon actual system configuration.

4 Barcode, 2nd USB-A, Serial (true) and HDMI in Top Expansion Area are mutually exclusive.

5 The module firmware and the device antenna system have obtained technical approval by commercial carriers in the US. It is customer's responsibility to assure that the module firmware and the device antenna system are compatible with the customer's private cellular network.

6 Requires software and activation to enable theft protection.

7 Battery performance features such as charge time and life span can vary according to the conditions under which the computer and battery are used. Battery operation and recharge times will vary based on many factors, including screen brightness, applications, features, power management, battery conditioning and other customer preferences. Battery test results from MobileMark 30 at 250 nit, Wi-Fi off and using the Professional scenario.

8 HDMI xPAK and True Serial xPAK adds a 0.1" and 0.2" bump out that increases the height and prohibits use in convertible mode.

9 TAA-compliant products are available upon request.

10 Second battery adds 0.5 lbs.

11 Requires software update.

12 With most configurations. Contact your Panasonic representative for details.

13 Rear camera is not certified with Red Hat Enterprise Linux
